ALPHA CORPORATION ON TWO WINNING TEAMS FOR CITY OF ALEXANDRIA COMMERCIAL PROPERTY AE SERVICES CONTRACTS

DULLES, VA, August 7, 2014: Alpha Corporation, a professional engineering/ construction management firm, is on two winning teams, each led by Little Diversified Architectural Consulting and Peck Peck and Associates, for on-call contracts to provide design and engineering services for small and medium-sized projects for the City of Alexandria, Department of General Services (DGS). Typical projects may include office renovations, space planning, electrical, plumbing and mechanical systems renovations, and other construction projects that DGS undertakes in its activities of maintaining and improving City properties and employee work space. Alpha Corporation's role for the Little Diversified team will include structural engineering. For the Peck Peck team, the role will include civil and structural engineering. Each team has been awarded a three-year base contract with two additional two-year options.

Alpha Corporation, a full-service woman-owned firm, provides civil/structural engineering, program/ construction management, project controls, and technology services for various building types and heavy infrastructure projects. Assignments have encompassed providing these services for a broad spectrum of clients, including all levels of government agencies, public and private enterprises/partnerships, Fortune 500/Global 1000 companies, institutions of learning, commercial developers, energy companies, contractors, architects, and more. Overall, the firm's project portfolio exceeds \$50B in program constructed value for the past 35 years. Alpha Corporation's vision is to be recognized by clients for responsive, innovative and quality services in the building and infrastructure sectors, and to be the employer of choice for professionals seeking stimulating and rewarding careers. Alpha Corporation's mission is to provide innovative and sustainable solutions for the lifecycle of building and infrastructure projects through the integration of best-practice engineering, program/construction management, project controls, and technology.
