## ALPHA CORPORATION ON WINNING TEAM FOR TOWN OF MOUNT JACKSON CONTRACT

**WINCHESTER, VA, March 27, 2014:** Alpha Corporation, a professional engineering/construction management firm, is on the winning Design Concepts team for an on-call contract to provide professional general engineering and architectural services for the Town of Mount Jackson, Virginia. Typical projects under this contract may include evaluation and design of water sewer facilities; design of improvements to wastewater pumping stations and well facilities; regulatory issues and coordination with regulatory agencies; site plan engineering and surveying; environmental engineering; storm water drainage; traffic impact analysis; road design; storm water management facilities; construction administration and inspection services associated with capital improvement projects. Alpha Corporation's role on this contract will include civil and structural engineering, surveying, and construction management. This one-year base contract has four additional one-year options.

Alpha Corporation, a full-service woman-owned firm, provides civil/structural engineering, program/construction management, project controls, and technology services for various building types and heavy infrastructure projects. Assignments have encompassed providing these services for a broad spectrum of clients, including all levels of government agencies, public and private enterprises/partnerships, Fortune 500/Global 1000 companies, institutions of learning, commercial developers, energy companies, contractors, architects, and more. Overall, the firm's project portfolio exceeds \$50B in program constructed value for the past 35 years. Alpha Corporation's vision is to be recognized by clients for responsive, innovative and quality services in the building and infrastructure sectors, and to be the employer of choice for professionals seeking stimulating and rewarding careers. Alpha Corporation's mission is to provide innovative and sustainable solutions for the lifecycle of building and infrastructure projects through the integration of best-practice engineering, program/construction management, project controls, and technology.
