ALPHA CORPORATION WINS NATIONAL MALL TURF CONTRACT

DULLES, VA, October 2, 2014: Alpha Corporation, a professional engineering/construction management firm, has been selected by the National Park Service to provide construction management services for Phases 2, 3A, and 3B of the National Mall Turf and Soil project. The National Mall is a cultural landscape which includes tree and turf-covered panels between the US Capitol and Washington Monument. More than 25 million visitors walk on these landscapes every year, compacting the soil structure, destroying the turf, and leaving behind a poor visual quality for the National Mall.

The scope of this project will focus on improving turf area conditions by re-engineering the soil; replacing the irrigation systems; installing drainage systems including granite curb, inlets and underground water collection systems, and storage structures; and re-establishing turf. The first phase of this project for which Alpha Corporation also provided construction management was completed in December 2013 and included rehabilitation of three turf panels (just west of the US Capitol), installation of two underground cisterns, and an underground pump station. This new contract will be a continuation of the work, including rehabilitation of five additional turf panels and installation of two underground cisterns.

Alpha Corporation, a full-service woman-owned firm, provides civil/structural engineering, program/ construction management, project controls, and technology services for various building types and heavy infrastructure projects. Assignments have encompassed providing these services for a broad spectrum of clients, including all levels of government agencies, public and private enterprises/partnerships, Fortune 500/Global 1000 companies, institutions of learning, commercial developers, energy companies, contractors, architects, and more. Overall, the firm's project portfolio exceeds \$50B in program constructed value for the past 35 years. Alpha Corporation's vision is to be recognized by clients for responsive, innovative and quality services in the building and infrastructure sectors, and to be the employer of choice for professionals seeking stimulating and rewarding careers. Alpha Corporation's mission is to provide innovative and sustainable solutions for the lifecycle of building and infrastructure projects through the integration of best-practice engineering, program/construction management, project controls, and technology.
