ALPHA CORPORATION WINS VDOT BRISTOL DISTRICT CONTRACT

DULLES, VA, December 11, 2014: Alpha Corporation, a professional engineering/construction management firm, has been selected by the Virginia Department of Transportation (VDOT) to provide professional engineering design services for the replacement of the bridge on I-81 (northbound lanes) over US 11, Norfolk Southern Railroad, Middle Fork Holston River, and associated approach roadways in Smyth County. This will be a multi-phase contract. Phase I (Preliminary Design) shall consist of the development and evaluation of alternatives for the proposed bridge rehabilitation/replacement along with necessary preliminary approach roadway work. The study will also evaluate the feasibility and economics of combining the replacement of the southbound bridge with that of the northbound bridge. Phase II (Final Design) will consist of providing bridge, highway and other ancillary design services for the selected alternative and developing full construction documents. Phase III (Construction Phase Services) focuses on providing design support during construction.

Alpha Corporation, a full-service woman-owned firm, provides civil/structural engineering, program/ construction management, project controls, and technology services for various building types and heavy infrastructure projects. Assignments have encompassed providing these services for a broad spectrum of clients, including all levels of government agencies, public and private enterprises/partnerships, Fortune 500/Global 1000 companies, institutions of learning, commercial developers, energy companies, contractors, architects, and more. Overall, the firm's project portfolio exceeds \$50B in program constructed value for the past 35 years. Alpha Corporation's vision is to be recognized by clients for responsive, innovative and quality services in the building and infrastructure sectors, and to be the employer of choice for professionals seeking stimulating and rewarding careers. Alpha Corporation's mission is to provide innovative and sustainable solutions for the lifecycle of building and infrastructure projects through the integration of best-practice engineering, program/construction management, project controls, and technology.
